

PAX-it!™

CD/DVD Creator & Off-line Archiving Module

Create Image CDs or DVDs right from within PAX-it!

- Fully integrated process – quick and easy.
- Image CDs or DVDs can be created in two formats:

In PAX-it format, including fully searchable PAX-it database information, for distribution to other PAX-it users. This allows you to:

- Copy multiple cabinets & folders at one time.
- Include overlays, notepads, database fields, etc.

In other standard file formats, for distribution and use outside of PAX-it.

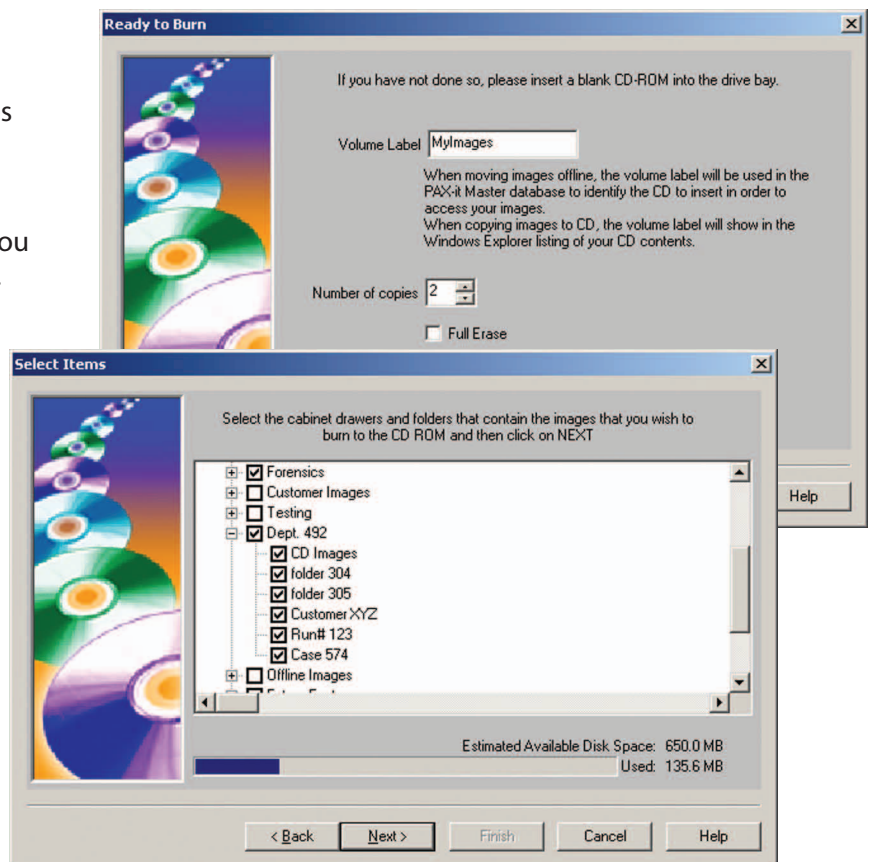

- Send images on CD or DVD to clients, vendors or co-workers.
- Copy images in standard file formats such as TIF, BMP, TGA, JPG, and others.
- Burn in an overlay template when creating the CD or DVD as an option to protect your property by applying your company name, website address or other important information on every image.

Save hard drive space by archiving off-line!

- Move some or all of your PAX-it images off-line and onto CDs or DVDs.
- Your PAX-it database information and image thumbnails remain on-line so you can still search and retrieve all images.

Protect your PAX-it image database by backing it up regularly!

- Back-up entire cabinet drawers or folders or even your whole collection at one time by simply and quickly burning a CD or DVD!
- The PAX-it CD/DVD Creator Module requires PAX-it version 6.1 or newer. Call or email for a quote to upgrade now!

Select cabinets, folders or entire collections to back-up and archive off-line.
